

TABLE OF CONTENTS

CHAPTER	PAGE
I. INTRODUCTION	1
A. Eruption and Impact of the Mount Pinatubo Volcano	1
B. Review and Perspective.....	5
1. Optical Properties and Radiative Forcing.....	6
2. Surface–Air Temperature Anomalies — Observed Data Analyses	8
3. Numerical Simulations	9
C. Outline of the Present Study.....	11
II. A BRIEF DESCRIPTION OF THE UIUC 24–LAYER ST–GCM.....	12
A. History of the UIUC GCMs.....	12
B. Basic Structure and Newly Implemented Components.....	13
C. Performance in Simulating the Present Climate	16
III. RADIATIVE FORCING	18
A. Introduction.....	18
B. Aerosol Optical Properties	20
C. Radiative Forcing	26
1. Definitions of Radiative Forcing	26
2. Instantaneous Radiative Forcing	27
3. Changes in Radiative Heating and Cooling Rates	34
4. Adjusted Radiative Forcing	38
D. Summary.....	42
IV. ANALYSES OF THE OBSERVED CLIMATIC CHANGES	44
A. Introduction.....	44
B. Changes in Atmospheric Temperature and Circulation.....	45
C. Surface Temperature Anomalies	49

1. Data	49
2. Index of Surface Temperature Anomalies.....	51
3. Composite Surface Temperature Anomalies	54
4. SVD Analyses of Surface Temperature Anomalies	59
a). The Tool.....	59
b). Method and Results.....	61
D. Summary and Discussion.....	70
V. MODEL SIMULATED CLIMATE CHANGES	74
A. Introduction.....	74
B. Design of the Ensemble Simulations	79
C. Results of the Ensemble Simulations and Comparison with Observations	81
1. Surface–Air Temperature Anomalies	81
2. Atmospheric Temperature and Circulation Changes.....	91
D. Influence of the QBO.....	103
E. Temperature Changes Induced by Ozone Depletion	107
F. Influence of the Ocean	114
G. Summary.....	121
VI. CONCLUSION	124
APPENDIX A. DEVELOPMENT AND VALIDATION OF THE	
UIUC 24–LAYER ST–GCM	129
1. Introduction.....	129
2. Model Description and Sensitivity Studies.....	129
a. Predicted Quantities and Numerical Solution Methods	131
b. Parameterizations – Treatment of Unsolved–Scale Physical Processes	132
3. Simulation of the Present Climate.....	153
a. Surface Quantities, Clouds and Radiative Fluxes	153
b. Atmospheric Temperature and Zonal Wind.....	166

c. Residual Circulation and Eliassen–Palm Flux Divergence	180
4. Test of Rayleigh Friction and GWD in a Mesosphere Model.....	184
5. Summary and Discussion.....	187
APPENDIX B. A MIE SCATTERING MODEL AND AEROSOL OPTICAL PROPERTIES.	190
1. Optical Properties of Individual Aerosol Particles	190
2. Mean Optical Properties.....	192
3. Optical Properties of Sulfate Aerosol.....	194
4. Spectral–Band Averaged Optical Properties of Sulfate Aerosol.....	197
APPENDIX C. ACRONYMS.....	199
REFERENCES.....	202
VITA	219
